

# DAIRY CARE LACTO

*Ready to use sprayable high visibility orange teat dip / spray based on lactic acid for use before or after milking. May be used during entire lactation period. This preparation has been designed to be used pre and post milking with cows, sheep and goats.*

## SAFETY AND HANDLING

### PRE MILKING

As with all dips a good pre-milking regime is essential. Dairy Care Lacto may be applied in foaming teat cups or by spraying. Wipe and dry with a disposable paper towel.

### POST MILKING

#### Teat Dipping

Immediately after the milking to apply Dairy Care Lacto by dipping. Ensure full length of the teats are covered. Carefully

empty and clean teat dip cups after every milking. Refill teat cups at each milking.

#### Teat Spraying

If the spray nozzle is adjustable, use a coarse spray (not a fine mist), and spray the entire surface of each teat. Avoid breathing in the spray.
